

FOR IMMEDIATE RELEASE

Gabriel Opens Application Development Laboratory

Rock Hill, S.C. – September 27, 2016 – Gabriel Performance Products (Gabriel), a market leader in epoxy additives and specialty chemical manufacturing, is proud to announce the opening of an Application Development Laboratory in Rock Hill, SC. The Application Lab will focus on supporting customers working on new developments with CAPCURE® and GABEPRO® mercaptans, Versamid® liquid polyamide resins and Phenoxy PK™ resins.

“Establishing an Application Development Laboratory is a key step toward implementing Gabriel’s strategy to expand our product offering in the CASE (coatings, adhesives, sealants, and elastomers) and composites markets,” said Gabriel Performance Products’ Vice President of Technology Greg Hahn. “The lab allows Gabriel to support new product development and help drive the growth of the company.”

Gabriel renovated laboratory space in its Rock Hill manufacturing location. Much of the necessary testing equipment has been installed. Pete Schreiber, Ph.D., joined the Gabriel team as the Director of Applications. Additional technical resources and equipment will be added as needed to support development projects.

For additional information about Capcure, Gabepro, Versamid, and Phenoxy PK products, and to request samples, please visit our website, www.gabrielchem.com. You may also contact our customer service department at customerservice@gabrielchem.com or call 1-866-800-2436 (CHEM).

Gabriel will be exhibiting at the CAMX show September 27 – 29, 2016. Visit our booth (Q58) to speak with our sales and technical team.

About Gabriel Performance Products

Gabriel Performance Products, LLC is a market-leader in epoxy additives and specialty chemical manufacturing. It produces both an extensive line of specialty proprietary products focused on coatings, adhesives, sealants, and elastomers products (CASE) and custom manufactured chemicals utilizing complex chemistries and processes. Gabriel is focused on expanding its epoxy specialty offerings beyond its market-leading mercaptan-based curative technology. For additional information, please visit www.gabrielchem.com.
